PROJECTS

DevHub IO - Full-Stack Job Marketplace (Currently Building) 🔗   01/2026 – Present
React 19 | Redux Toolkit | Tailwind CSS | Node.js | Express 5 | MongoDB | JWT
- Developed a REST API with Node.js and Express handling user authentication, job creation, application management, and recruiter features using MongoDB for data persistence.
- Implemented a JWT-based authentication system with role-based access control for job seekers and recruiters, integrated with frontend Redux state management.
- Built database models and routes for job listings, application tracking, and user profiles, providing core backend functionality for the marketplace platform.
